TOTALS:-	68	77	145
Total deaths, Cancer.	15	13	28

The number of births (271) has decreased by 2 from 1952. The deaths have decreased by 51. This considerable decrease is due to change in the allocation of Inward Transferable deaths from Institutions by direction of the Registrar General. This has not been reversed and so this district will have a death rate comparable with previous years in 1954.

Deaths from Cancer have decreased over 1952 as can be seen from the preceding table. The Infantile death rate is about the same as that of the past year and compares favourably with the national figure.

GENERAL PROVISION OF HEALTH SERVICES IN THE AREA.

The removal of patients from the district to the Isolation Hospitals of the Regional Hospital Board has worked satisfactorily during the year.

SANITARY CIRCUMSTANCES OF THE DISTRICT - WATER SUPPLIES.

4450 houses out of a total of 5,267 are supplied with piped water. The water of the two main reservoirs is chlorinated.

Work has begun on the Cookhill section of the northern area to supply water in this district.

The monthly samples taken during the year - 84 in all - show uniformly satisfactory results, but the analyses from 25 samples of well water vary very considerably.

There is no Plumbo-solvency in the district. The following table shows the supply to local villages:-

DIPHTHERIA.

No cases were notified during the year.

SCARLET FEVER.

13 cases notified. 1 sent to hospital. No deaths.

WHOOPIING COUGH AND MEASLES.

There was an outbreak of measles, the majority of cases occurring in the age group 5 - 9 years during the 2nd quarter of 1953. The cases were of a mild type there were no deaths. The number of whooping cough cases showed an increase from last year. No deaths were recorded.

ACUTE POLIOMYELITIS.

1 case was notified during the year the evidence pointing to the infection having been contracted away from home. There was no ensuing paralysis the patient making a good recovery.

DIPHTHERIA IMMUNIZATION.

During the year 267 children, the same as in 1952 were immunized; 196 in the 0 - 4 group and 11 in the 5 - 14 age group. The number immunized by medical practitioners are included. The majority of children immunized are done in their first year. In the period 1940 - 1953, 2925 children have been protected. Reinforcing doses were given to children previously immunized during infancy. There have been very many more children given these reinforcing doses this year, 417 as against 266 in 1952. These figures include injections given by medical practitioners.

SCHOOL CLOSURE.

No schools were closed during the year.

TUBERCULOSIS.

The following table gives particulars of the nine cases of Tuberculosis and of all deaths in the area during 1953:-

AGE PERIODS.	New Cases.				Deaths.			
	Pulmonary.		Non-Pulmonary.		Pulmonary.		Non-Pulmonary.

TOTALS:-	5	3	1	-	-	-	-	-

There were the same number of notifications as last year and no deaths as against one for 1952.

The figures of Tuberculosis have altered little, but there have been no increase either in cases or deaths.

The figures previously recorded give cause for reasonable satisfaction as indicating the satisfactory state of the general health of the area. Houses are being built as rapidly as possible and the questions of sewerage and water supply are continually under review.

I wish to thank the Sanitary Inspector and his staff for their assistance during the year.

I am,

Your obedient Servant,

J.J. MURRAY.
